

Social distancing guidelines for food pick-up

- Most importantly: stay home if you are sick
- Practice good hand washing hygiene
- At meal distribution sites:
 - For parents walking with children to get meals, please remind families to keep family units 6 feet away from other family units as they line up
 - For parents in cars, they can open car windows and stretch out an arm to receive food parcels; If the food distributor does the same, you will maintain a safe distance
 - Whenever possible, from inside the car, the driver opens the hatch or trunk from inside, and the food distributor places food packages in there
- In playgrounds, parks and on street corners
 - Stop hand-shaking as a greeting, wave to friends and neighbors from 6 feet away
 - Remind children before you go outside, to wave to friends and talk from a distance
 - Adults need to model this behavior, if they expect children to keep distance from their friends
- Visiting Family
 - This is not a good time to visit grandparents or elderly of any sort
 - If family members need help shopping, ring their doorbells and drop bags or boxes of groceries at their doorstep
